The Deep Gravel has a lot going for! The design is inspired by road stiffness with an asymmetric rear and comfortable seat angle, this bike offers a lot of fun, comfort and dynamics. With slick tires it offers a road bike with racy properties, no mountain is too high for it. With wide low pressure tires you can change it into a Beach racer and with MTB tires it's a solid hardtail MTB.

What more do you need? It's also remarkably light, starting from 8.6kg. Riders describe the Deep Gravel as responsive, fast and yet still comfortable. We look forward to its new hybrid fiber that has been scheduled for summer 2022.

The Gravel comes with excellent choice SRAM and Campagnolo groupsets. The standard wheels from Miche Racing Pro 33 are good. Excellent are the Zonda wheels and 14C's handmade carbon wheelset using DTswiss hubs.

"Cyclingplatform, December 2020"
